

Career & Interest Exploration

Career & Interest Exploration

Each girl's interests and hobbies are as unique as she is. Thankfully, there's a world of possibilities to explore through Girl Scouts. Girls delight in trying new things when they're young and start exploring potential careers as they get older. For girls, the future is bright!

Skill-building Categories include:

The Arts

Girls gain confidence by expressing themselves through a variety of artistic mediums. They take something imagined and transform into reality.

Topics include: music, computer arts, visual arts, photography, theater and dance

STEM (Science, Technology, Engineering, & Math)

Girls gain the skills to question, investigate, hypothesize, experiment, and iterate. They gain confidence in their problem-solving and teamwork abilities.

Topics include: science, technology, engineering, math, coding and computers, robotics, human biology

Career Exploration

Girls gain a broader view of career paths available to them, and the skills needed to advance in whatever path they choose.

Topics include: computer use skills, job shadowing, career advancement skills, leadership through management

Entrepreneurship

Girls gain an entrepreneurial mindset for business basics, teamwork, problem-solving and overcoming challenges.

Topics include: basic business budgeting, marketing, understanding customer needs, product design, business ethics

History & Traditions

Girls improve appreciation for the history of their favorite things: their community, Girl Scouts, or any area of interest. Along the way, they gain the tools and understanding needed to apply historical knowledge to present and future challenges.

Topics include: local history, history of any specific topic/product/place, Girl Scout traditions
